

# Anshuk Jirli

anshuk.jirli2002@gmail.com | +91-8951830430 | linkedin.com/in/anshuk-jirli | github.com/geeked-anshuk666

## Professional Summary

Computer Science graduate proficient in **Python, Django, RESTful APIs, and cloud deployment**. Demonstrated expertise architecting scalable backend systems, automating workflows, and optimizing performance. Pursuing **Software Developer, Software Engineer, or Backend Engineer** role to deliver secure, production-ready solutions.

## Experience

- Software Developer**, Anexgate Network Security Solutions – Belagavi, Karnataka, India Feb 2025 – Present
- Delivered full-stack ticketing system (**Django, PostgreSQL, Azure AD**) in 4 days, scaled to **3000+ daily tickets**, elevated support efficiency by 30% and user satisfaction by 40%.
  - Orchestrated email/SMS pipelines using (**SendGrid API, Twilio**); maintained **Nginx, Gunicorn, Docker** deployment on **DigitalOcean** achieving 99.9% uptime.
  - Architected **124+ RESTful APIs** for AnexUSG Firewall spanning Routing, IDS/IPS, VPN, SD-WAN, Policy Management; secured endpoints using **token authentication, API keys and protobuf** serialization.
  - Refactored **PostgreSQL ORM** queries, amplifying data throughput by 40%.
  - Engineered AnexHUB **SaaS cloud** module governing multiple USG devices; eliminated 50% network overhead by **AJAX optimization, pagination**.
  - Integrated **125+ REST API scripts** powering dashboards, analytics, logging, reports generation and hardware metrics; containerized services with **Docker**. Leveraged **Celery and Redis** for async tasks and task queuing.

## Technical Skills

**Languages:** Python, Java, C | **Frameworks:** Django, FastAPI, Flask, Django REST Framework, Bootstrap, TailwindCSS

**Frontend:** HTML, CSS, JavaScript, Figma | **Databases:** PostgreSQL, MySQL, SQLite, Redis

**DevOps:** Docker, Nginx, Gunicorn, DigitalOcean, Render | **Version Control:** Git, GitHub, GitLab

**Cloud & CI/CD:** Azure AD, SendGrid, Twilio | **AI Tools:** ChatGPT, Claude AI, Grok AI, Google Gemini, Cursor, Trae AI

**Other:** Unix/Linux, Machine Learning, Prompt Engineering.

## Projects

**Food Delivery Microservices Platform** | Python, FastAPI, SQLAlchemy, Redis, Docker, Swagger, Render

Git/Github GitHub

- Built scalable microservices for Users, Restaurants, and Delivery using **FastAPI, SQLAlchemy, Docker**, with fully documented Swagger APIs.
- Improved order-processing throughput 30% using async I/O and Redis-backed task execution.

**Skin Disease Classifier** | HTML, CSS, TailwindCSS, JavaScript, Python, Flask, Machine Learning, VGG16

GitHub

- Trained image classifier (**VGG16**) achieving 90% accuracy across four skin disease categories.
- Crafted interactive **Flask** web interface facilitating image uploads and real-time predictions.

**Air Ticket Booking System** | HTML, CSS, PHP, MySQL, Xampp

GitHub

- Implemented full-stack booking platform (**PHP, MySQL**) guaranteeing real-time seat management.
- Enhanced reliability using strong validation logic and ACID-compliant MySQL operations.

## Education

**S G Balekundri Institute of Technology**, Belagavi, Karnataka, India – BE in Computer Science Engineering

June 2024

## Certifications

Electronic Arts Software Engineering Virtual Experience Programs (Forage).

Wells Fargo Software Engineering virtual experience program (Forage).
